

# Looking for Teachers Interested in Aquaponics!!!

## SPACE LIMITED – FIRST COME, FIRST SERVE

### LOOKING FOR TEACHERS INTERESTED IN AQUAPONICS!

Jeff Giallombardo, aquaponics teacher at Nokomis Regional High School, in partnership with Maine Agriculture in the Classroom, will present a workshop in their brand new facility on ***Saturday, March 28th from 9:00 to 2:30***. This session will reveal everything teachers need to know to have their own successful aquaponics program.

Participants will experience hands-on training working directly with a small commercial sized aquaponic system. At the end of the training one participating teacher will win a STEM Garden classroom aquaponics system donated by [Maine Agrotech](#) (valued at \$1,900) with the knowledge needed to manage and integrate the system directly into their classroom STEM instruction.

This hands on workshop will cover basic to advanced topics in aquaponics including:

- What aquaponics is and how it works?
- Implications for industry in Maine and beyond.
- Educational benefits and applications
- Water quality and pH management
- Fish selection and management
- Plant selection and management
- Nutrient management
- Integrated pest management
- Environmental controls AND MORE!

TO REGISTER PLEASE EMAIL THE FOLLOWING INFORMATION BY MARCH 20 TO [MAITC@MAINE.GOV](mailto:MAITC@MAINE.GOV)
