Climate & Soil

- Nebraska has a typical Midwestern climate, which means big extremes between the four seasons – hot summers, cold winters, and moderate precipitation.
- The Nebraska State Soil is Holdrege. This soil is ideal for crops, pasture, or rangeland.
- From east to west, Nebraska experiences a 4,584-foot elevation difference.
- Most of Nebraska's soil was formed from wind-blown silt and clay or loess while soil in north central Nebraska, also known as the Sandhills, was formed from wind-blown sand.
- The average annual precipitation is 30.25" and decreases one inch every 25 miles from east to west across the state.

Crops & Livestock

- Nebraska's ten leading commodities (in order of value) for 2016 cash receipts are cattle and calves, corn, soybeans, hogs, dairy products, wheat, hay, chicken eggs, dry beans, and sorghum.
- In 2017, Nebraska ranked 1st in commercial red meat production. Cattle outnumber people in Nebraska 4 to 1.
- In 2017, Nebraska ranked 3rd in corn for grain production – 1,683,300,000 pounds.
- Nebraska's production of corn, livestock, and ethanol is known as "Nebraska's Golden Triangle."
- In 2017, Nebraska ranked 4th in soybean production and alfalfa hay production.
- Each year, Nebraska harvests between 55 and 70 million bushels of wheat.
- In 2017, Nebraska ranked 5th in sugar beet production. The sugar beet is a root crop used for sugar production.
- Nebraska has the 6th largest swine herd in the nation.
- In 2017 Nebraska ranked 1st in Great Northern Bean Production and was listed as a top producer of pulses, a group of crops that includes field peas, dry beans, chickpeas, and lentils.
- More than 9.5 million chickens populate Nebraska's chicken laying farms.
- There are approximately 50,000 bee colonies in Nebraska.

General

- 91% of the state's total land area is utilized for farms and ranches.
- 1 in 4 jobs in Nebraska are related to agriculture.
- Every dollar in agricultural exports generates \$1.28 in economic activities such as transportation, financing, warehousing and production. Nebraska's \$6.58 billion in agricultural exports generates \$8 billion in additional economic activity.
- The average age of a Nebraska farmer or rancher is 56.
- Nebraska's current director of agriculture is Steve Wellman.
