Average Farm Size: 430 acres
Total Farmland: 16 million acres

Climate & Soil
• Oregon’s climate is ideal for the production of numerous crops.
• Oregon has seven distinct growing regions: the Oregon Coast, Willamette Valley, Southwest Oregon, High Desert, Columbia Basin, Northeast Oregon and Southeast Oregon.
• Oregon averages 31” of rainfall, however areas on the Oregon coast average over 90” per year while Eastern and Southern Oregon are much drier. Fourteen of the 36 counties average 15” of rainfall or less.
• Oregon summers are very dry. The state relies heavily on irrigation. Nearly 78% of water usage in Oregon goes for farm irrigation, compared to 40% nationally.
• Oregon has approximately 2,000 different types of soil.
• The depth of Oregon’s topsoil averages about 10”. This varies greatly from the coastal areas, forests, valleys, and Southern and Eastern regions of the state.

Crops & Livestock
• Crops account for 66% of the state’s total sales.
• Greenhouse and nursery, cattle and calves, hay, grass seed, milk, wheat, wine grapes, potatoes, blueberries and pears are the leading crops in Oregon.
• Oregon leads the nation in the production of hazelnuts ryegrass seed, orchardgrass seed, crimson clover, fescue seed, sugarbeet for seed, red clover seed, potted florist azaleas, Christmas trees, and rhubarb.
• Oregon ranks #2 in the nation for the production of white clover seed.
• Beef cattle and dairy products are the most important livestock commodities to Oregon and rank as first and fifth on the top commodity list.
• Groundfish, crab, shrimp, tuna, salmon, and oysters are important to the commercial fishing industry in Oregon.
• Livestock and poultry account for 34% of the state’s total sales.

General
• More than 225 different commodities can be found throughout Oregon.
• Oregon exports about 80% of its agricultural products, with nearly 40% leaving the country.
• More than 100 farmers markets are in Oregon.
