

# Growing Young Minds:

A Professional Development Series  
presented by  
Agriculture in the Classroom

Standards-based, hands-on activities designed to be incorporated into daily curriculum.

Cross-curricular lessons using proven methodology along with practical ideas ready for instant use in the classroom.

Teacher resource kit for each participant including curriculum, books, and posters.

Workshops and resources are provided free of charge!

*Connecting Children to Agriculture*

## Professional Development

### Highlights and Features:

- Agriculture in the Classroom uses Virginia agriculture and natural resources as the hands-on medium to teach required science, social studies, language arts, and mathematics content.
- Activities cover such concepts as Virginia Resources, Measurement, Life Processes, and Scientific Investigation and many more!
- Approximately 2000 teachers enjoy these lively and informational workshops each year and 99% would recommend the training to a colleague.

*We also offer a specialized PreK workshop utilizing the Foundation Building Blocks.*
